

Data Exploration Challenge

- Basic Stats:
 - How many rows are in the dataset?
 - How many distinct rows are there?
 - Identify missing cells and duplicate rows.
- Most Interacted Users:
 - Determine the count of mutual interactions among the most interacted users.
- Cash App Usage:
 - Find the number of users who used Cash App for less than 1 year.
 - Find the number of users who used Cash App for more than 8 years.
- Transaction Amount:
 - Calculate the 99th percentile of the transaction amount.
- Feature Correlation:
 - Discover if any features (columns) are correlated with each other.
